

SOIL HEALTH LAB TECHNICIAN

The Chinook Applied Research Association is now accepting applications for a Soil Health Lab Technician located at Oyen, Alberta. We need to fill this position as soon as possible – please respond immediately if interested.

Duties:

- Assist with the preparation and evaluation of soil and plant samples according to appropriate laboratory standards and protocols
- Assist with general laboratory procedures and maintenance, including cleanliness of laboratory equipment and tools
- Assist with organization of materials for training events

Qualifications:

- Basic understanding of soils and agricultural production
- Aptitude for performance with great attention to detail
- Ability to follow instruction
- Ability to work in a team atmosphere
- Laboratory and microscope experience would be beneficial, but on the job training will be provided

Competition will remain open until position is filled
